

Learning Academy  **Online**
SATURDAY SCHOOL

ROBOTICS

Learn to code and get the skills to program an actual robot!

Learning Academy Online's innovative class for middle-schoolers teaches robotics programming skills through a variety of activities using the platform CoderZ. Through this platform students will arrange codes to send different commands to their virtual robots. Students will sharpen their problem-solving skills as well as learn about basic and more advanced robotic operations.

This program is for Middle School students in grades 6 to 8.

2020-2021 VIRTUAL PROGRAMS SATURDAYS / 9:00 - 11:00 AM
